

## **Grades 6-8 SUMMER MATH VOCABULARY TERMS**

Your 2018 summer math assignment is to define the following terms on index cards. The term will be on one side of the card and the definition on the other side. Please place all index cards in a zip lock bag with your name on it. You will have several quizzes throughout the school year on these vocabulary words.

- |                                    |                                 |                            |
|------------------------------------|---------------------------------|----------------------------|
| 1. Acute Angle                     | 39. Least Common Multiple (LCM) | 78. Repeating Decimal      |
| 2. Algebraic Expressions           | 40. Line                        | 79. Rhombus                |
| 3. Angle                           | 41. Line Graph                  | 80. Right Angle            |
| 4. Average                         | 42. Line of Symmetry            | 81. Scale Drawing          |
| 5. Bisect                          | 43. Line Segment                | 82. Scalene Triangle       |
| 6. Box Plot                        | 44. Mean                        | 83. Slope                  |
| 7. Circumference                   | 45. Median                      | 84. Solution               |
| 8. Coefficient                     | 46. Mode                        | 85. Solve                  |
| 9. Complementary Angles            | 47. Negative Integer            | 86. Square Root            |
| 10. Congruent                      | 48. Numerator                   | 87. Statistics             |
| 11. Constant                       | 49. Numerical Expression        | 88. Stem and Leaf Plot     |
| 12. Coordinate Plane               | 50. Obtuse Angle                | 89. Straight Angle         |
| 13. Cubic Units                    | 51. Octagon                     | 90. Supplementary Angles   |
| 14. Data                           | 52. Ordered Pair                | 91. Symmetric Distribution |
| 15. Denominator                    | 53. Outlier                     | 92. Terminating Decimal    |
| 16. Dependent Variable             | 54. Parallel Lines              | 93. Trapezoid              |
| 17. Diameter                       | 55. Parallelogram               | 94. Triangular Prism       |
| 18. Equation                       | 56. Pentagon                    | 95. Unit Price             |
| 19. Equilateral Triangle           | 57. Percent                     | 96. Unit Rate              |
| 20. Equivalent Expressions         | 58. Perimeter                   | 97. Variable               |
| 21. Evaluate                       | 59. Perpendicular Line          | 98. Vertex                 |
| 22. Exponent                       | 60. Pi                          | 99. Vertical               |
| 23. Formula                        | 61. Plane                       | 100. Volume                |
| 24. Fraction                       | 62. Point                       |                            |
| 25. Function                       | 63. Polynomial                  |                            |
| 26. Graph                          | 64. Polygon                     |                            |
| 27. Greatest Common Factor (GCF)   | 65. Prism                       |                            |
| 28. Hexagon                        | 66. Proportion                  |                            |
| 29. Histogram                      | 67. Quadrants                   |                            |
| 30. Horizontal                     | 68. Quadrilateral               |                            |
| 31. Independent Variables          | 69. Radical Sign                |                            |
| 32. Inequality                     | 70. Radius                      |                            |
| 33. Integer                        | 71. Range                       |                            |
| 34. Intersecting Lines             | 72. Rectangular Prism           |                            |
| 35. Interval                       | 73. Rate of Change              |                            |
| 36. Inverse Operations             | 74. Rational Number             |                            |
| 37. Isosceles Triangle             | 75. Ray                         |                            |
| 38. Least Common Denominator (LCD) | 76. Reciprocals                 |                            |
|                                    | 77. Reflection                  |                            |
